

# C.R. ONSRUD ANNOUNCES DISTRIBUTION AGREEMENT WITH EMEC MACHINE TOOLS INC.

For Immediate Release

**Mississauga, Canada, April 2016:** C.R. Onsrud (North Carolina, USA) and EMEC Machine Tools Inc (Mississauga, Ontario, Canada) have executed a partnership agreement for distribution, service and support of CR Onsrud Routers. EMEC will distribute CRO products to the Advanced Materials Industry for Eastern Canada from Manitoba through to the Maritimes.

C.R. Onsrud has been around for decades cutting wood, metals, composite materials, plastics, and more. From their state-of-the-art factory in Troutman, North Carolina, C.R. Onsrud manufactures some of the most highly sought-after CNC machines on the market today. Design, engineering and production teams, spend many long hours, tirelessly crafting, building and tuning machines, and every product that departs their facility, is a unique and exceptional workhorse - created with the customer's specific manufacturing need in mind. Companies turn to them for their machinery needs, because they can offer them a tailor-made solution rather than an off-the-shelf, stock machine.

"CR Onsrud is very pleased to announce our partnership with EMEC Machine Tools. Our companies share the highest values and a mutual commitment to providing the very best equipment solutions, service and support. This agreement will open new avenues into the Advanced Materials Industry for both our companies. EMEC and CRO will utilize our experience in specialized application engineering and machine design, along with advanced online/local support and service, to provide new and innovative solutions for our Customers." Mike Schwartz, National Sales Manager of C.R. Onsrud.

We look forward to having the C.R. Onsrud team onboard and look forward to growing our new partnership.

## **About C.R. Onsrud**

C.R. Onsrud CNC machines are found in the manufacturing facilities of many of the largest brands in the world, whose team takes pride in living up to those lofty standards. Walk into manufacturing facilities across the world, and you'll see components and parts being made on their machines for Boeing, Goodyear, Steinway & Sons, and many, many more. They'll immediately tell you the value and performance the Onsrud label brings to their bottom line.
